1. The drawings filed 01/31/2006 are acceptable.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, in a pressure bonding machine for pressing pressure bonding surfaces of pressure bonding tools onto works to thereby perform a pressure bonding operation, the prior art does not teach or make obvious the concept of a single descending limit position regulating member for regulating descending limit positions of said plurality of elevating portions; and an elevating means for elevating said descending limit position regulating member so as to allow said elevating portions to ascend/descend and bring said pressure bonding surfaces of said pressure bonding tools into contact with said works; wherein height positions of said pressure bonding surfaces of said pressure bonding tools are made different from one another in a state where said descending limit positions of said plurality of elevating portions are regulated by said descending limit position regulating member in the manner claimed by the applicant.

Regarding claim 6, in a pressure bonding machine for performing a pressure bonding operation, the prior art does not teach or make obvious the concept of a descending limit position regulating member for regulating a lower limit position of said first elevating portion so as to regulate height of said pressure bonding surface of said

Art Unit: 1791

first pressure bonding tool and regulating a lower limit position of said second elevating portion so as to regulate height of said pressure bonding surface of said second pressure bonding tool to thereby keep said pressure bonding surface of said second pressure bonding tool at a higher position than said first pressure bonding surface; and an elevating means for changing height of said lower limit position regulating member so as to bring said pressure bonding surface of said first pressure bonding tool into contact with an electronic component on said first substrate supported by said lower guard member and apply thereto a force from corresponding one of said pressure generating means, and so as to bring said pressure bonding surface of said second pressure bonding tool into contact with an electronic component on said second substrate supported by said lower guard member and apply thereto a force from corresponding one of said pressure generating means in the manner claimed by the applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
